

# Year 3 Organising, creating and presenting – Knowledge Organiser

## Key words and prior learning from Y2 unit 'Create a topic-based eBook'

**Online Image** – You can search for images that are saved online

**File Types** – Files can be saved as different file type such as Paint Files, Write Files, Images and Mix files.

**Presentation Software** – this software can be used to create an eBook that presents our research

## New key words we will use in Year 3 'Organising, creating and presenting'

**View and edit mode** – most programs with edit mode toggle between "view" and "edit." When in the "view mode," the user can only look at the file; however, in "edit mode," the user can view and change its contents

**Fill borders and frames** – a presentation technique used to add colour for effect or meaning

**Import and export** - importing and exporting allow different computer programs to read each other's' files. "Import" means to bring a file from a different program into the one you're using, and "export" means to save a file in a way that a different program can use it

**Layering** – to organize the arrangement of objects (photos, text, graphics and background colours) you've placed on a page so that you can manipulate them more easily.

**Stop motion animation** – take a photo of an object or scene and slightly move the objects before taking another photo. This process is repeated until the scene is completed and uses each photo as a frame in the animation

**Onion skinning** – a technique used in animation which lets you see a 'ghostly' image of the previous captured frame over your new frame so that you can line up objects accurately before capturing the next frame

**GIF** – stands for Graphics Interchange Format. GIFs are a series of images or soundless video that will loop continuously and doesn't require anyone to press play

**Page orientation** - is the direction in which a document is displayed or printed. The two basic types of page orientation are portrait (vertical) and landscape (horizontal)

Key Learning	Self-Assessment		
	WT	A	WA
I can add and edit text to improve its presentation and can adjust its position on the page			
I can search and upload an appropriate image into my work			
I make decisions over colour schemes, combine text and images and work with layers on the page			
I can use tools to create a digital worksheet that includes objects that are locked or free to move around the page			
I can add an image as a background and change its transparency to improve the presentation of my work			
I can take an image using a camera and retrieve a saved image			
I can remove the background of an image			
I can save my work and retrieve previously saved files and continue working with them			
I can create a simple stop motion animation			
I understand about the onion skinning technique and how it is used in animation			
I know what a GIF is and can upload it into another work file			

## Who uses skills like these?

- Magazine creators, and publishers who make books and digital books
- Graphic artists – making adverts, web pages, logos
